

The Ambio Vision

Your Trusted Partner in Ocular Treatment

OPHTHALMOLOGY

 corzamedical

Corza's Ambio amniotic membrane products deliver consistent, reliable performance in the treatment of ocular surface diseases and disorders. Designed for both in-office and surgical settings, these products offer enhanced flexibility, providing your patients with the care they deserve.

AmbioDisk[®] AMNIOTIC MEMBRANE

(Surgical Amnion & Intermediate Layer Grafts)

- Available in 5mm, 8mm, 9mm, 12mm, and 15mm circular grafts.
- NEW 5mm and 8mm sizes for increased versatility in treating a range of ocular conditions.
- Ideal for recurrent corneal erosions, corneal ulcers, neurotrophic ulcers, and dry eye conditions.

Ambio2[®] AMNIOTIC MEMBRANE

(Surgical Amnion & Intermediate Layer Grafts)

- Available in 1.5 x 2.0cm, 2.0 x 3.0cm, and 4.0 x 4.0cm rectangular and square graft shapes.
- Designed for surgical applications, including pterygium excision, corneal erosions, and chemical burns.

Ambio5[®] AMNIOTIC MEMBRANE

(Surgical Amnion, Intermediate & Chorion Layer Grafts)

- Available in 1.5 x 2.0cm, 2.0 x 3.0cm, and 4.0 x 4.0cm rectangular and square graft shapes.
- Multi-layer graft combining amnion intermediate and chorion layers for advanced surgical applications.
- Ideal for surgical applications including, fornix reconstruction, symblepharon, pterygium excision, and Stevens-johnson syndrome.

Key Benefits:

Patient Friendly

Well tolerated and held in place with a standard BCL. No tarsorrhaphy required which enables patients to maintain binocular vision.

Consistent Supply

We ensure reliable, on-time delivery of Ambio grafts, so you can always depend on us for your patients' needs.

Flexible Sizing

The new AmbioDisk sizes, including the 5mm and 8mm circular grafts, offer greater flexibility, ensuring the right fit for a wider range of patient conditions.

Easy-to-Use

Ambio2 and Ambio5 grafts now feature a simple notch for orientation, providing clear identification of the amnion, intermediate and chorion layers where applicable—helping streamline procedures and reduce tissue waste when the notch is in the upper-left hand corner or 10 o'clock position, the graft is amnion/epithelial side up.

Shelf-Stable

All products are processed using the BioPur processing technique, ensuring shelf stability for up to 4 years.

AmbioDisk[®] AMNIOTIC MEMBRANE (Amnion & Intermediate Layer Graft)

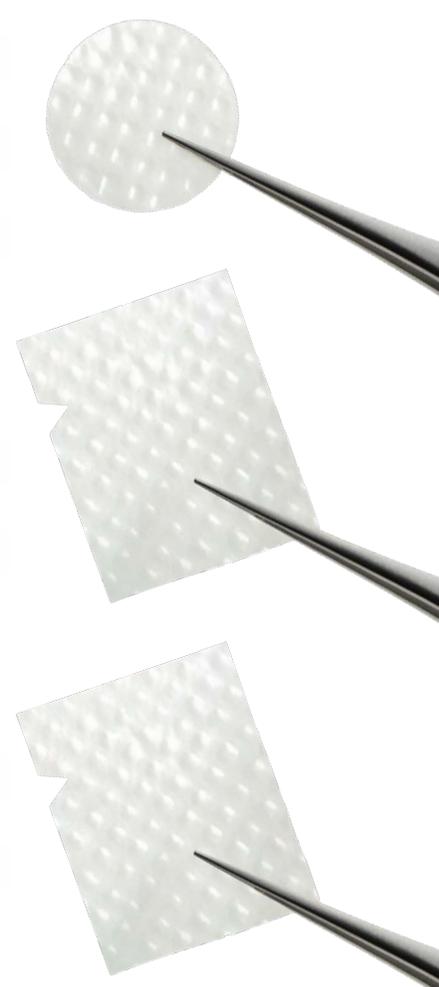

AD-5050	5mm circular
